

VIROMAX™ IN-LINE BVF

BIDIRECTIONAL BACTERIAL-VIRAL FILTER FOR IN-LINE USE

ViroMax™ bacterial-viral filter features coaxial ISO connectors for applications in many stages of breathing circuits and mechanical ventilation.

- Bacterial filtration efficiency: > 99.999%
- Viral filtration efficiency: > 99.99%
- Flow resistance: 1.5 cm H₂O @ 60 L•min⁻¹
- Low effective dead space: 45 mL
- Electrostatic media in protective membranes
- ISO 5356 Connectors: 15F/22M, 15M/22F
- Bidirectional airflow
- Disposable, for single-patient use only
- Free of latex, PVC, DEHP, BPA
- Transparent housing for visual inspection

A-M Systems strictly adheres to and manufactures products under the standards of:

- **ISO 13485:2016**
- **FDA Quality System Regulations**
- **EU Medical Device Directive**
- **Canada Medical Device Regulations**
